

Elite E Services is a group of quants, traders, programmers, and financial professionals. A registered CTA with the CFTC and an NFA Member, Elite E Services develops foreign exchange trading systems for our clients, as well as providing an I.T. service to the financial services industry.

Services EES can provide:

- FX Consulting – Foreign exchange is a complex and dynamic market, without the proper experience costly mistakes can be made. EES can consult you and your team regarding implementing FX in your own business, whether it be for hedging, FX investing, or adding FX managed accounts to your existing portfolio. Knowing what to look for in FX is 90% of the battle.
- Trading Systems Development – Based on your portfolio requirements, we can develop custom trading systems that suit your needs.
- Mathematical Modeling – Existing strategies may require optimization, or precise mathematical modeling, to improve their performance and fine tune their results.
- Trade clearing and execution (through our broker relationships – EES is not an FCM or broker/dealer).
- Custom Programming – In trading languages or computer languages, we can code your system in: Tradestation, eSignal, Meta Trader, C++, Visual Basic, or Java
- I.T. Design for development and trading setups – Even if you have an I.T. department, FX experience can help solve issues common I.T. managers may not be aware of in FX such as network latency, or the real-time delay issues experienced by many ISPs.
- FX trading tools and plugins – We have developed many useful trading tools for our own use and for our clients, which can provide out of the box solutions for your trading needs.
- Currency Hedging and Overlay – Businesses with foreign exchange exposure, foreign or domestic, require FX expertise to model their flows to mitigate risk.

Elite Highlights:

- EES leverages our own experience to save time and money
- Registered companies in 4 countries, clients in 35 countries
- Vast technical and developer contacts
- From 2001 – 2004 our trading portfolio returned over 500% in returns (purchased Gold at 279, NZD/USD at .40, Rhodium at 400, DROOY at .89)
- 2005 – 2007 Automated systems returns all over 50% per year

Although our experience is FX specific, most of our technologies could be used on other markets – in our view, data is data. We prefer FX due to its vast liquidity, numerical simplicity, and widespread appeal. Elite E Services is a full service FX Technology brokerage, who wants to bring your FX trading to the next level. Please contact us at: 646-837-0059 or email elite@airpost.net
